Here's what the students have to say:

From S.W.

I have always had an interest in the environment. My yard has three garden and wildlife certifications. A few years ago, my cable box had bees. The cable company sent out Truly Nolen. I panicked. I cried and begged the gentleman not to spray pesticides in my yard. He agreed to use dish soap. It saved my plants and butterfly garden, but not the bees or the tons of honey that was in there.

That started my interest in saving the bees. It took a while, but I finally found Dan Novak. His course gave me the knowledge and the courage to keep my own bees. Dan's class was the perfect combination of book learning and hands on experience. He taught me how to build my nuk box. He was patient the first time we went into his bee box. He made it possible for me to get over that initial anxiety. I got my bees from a friend of Dan's in October. I now have two brood boxes and a honey super. Dan's class did not end with the last session. He has continued to guide and help me.

Combine that with the wonderful support of the Broward Beekeepers, I am looking forward to a long and successful bout of beekeeping.

From N.H.

I took a class on bee keeping from Dan, his knowledge and expertise is unbelievable. The class was well worth the fee and I now feel like I can tackle my bees in a professional manner.

I would highly recommend this class to anyone from novice to intermediate.

From P.M.

If you're interested in bee keeping... or would like to be a better beekeeper... this is the course for you. The course information is provided in thoughtful, organized and practical way. You learn the essentials about bees, how to take care of them and what to expect in the endeavor of being a good beekeeper. I really enjoyed the course. The instructor Dan Novak, a professional who sets the tone of a serious exploration of bees and beekeeping, has reasonable expectations of his students, and delivers the knowledge you need to know about being a beekeeper. Take the course! You won't regret it!!
